

Plant List 2026–2027

Last updated: 24th June 2026 – 1st Edition

Please read before looking at the Plant List:

We will do our very best to keep this plant list updated regularly; however, as we are a small working nursery open to the public, availability can change daily and some items may sell out quickly. We do not produce a traditional stock list for this reason. A large majority of our plants are propagated here at the nursery, and our long-term aim is complete self-sufficiency in growing all our own stock. This allows us to offer an ever-evolving range of carefully grown, high-quality plants suited to our climate and growing conditions. We take growing orders for the more unusual plants on the list and timings can be advised on request. We grow our plants in 9cm, 1L and 2L pots with some exceptions for shrubs and bigger grasses.
